

Laxafit

Your dog has a unique collection of hundreds of different types of bacteria and other microbes (such as viruses, fungi, etc) in its gastrointestinal tract (GI Tract), referred to collectively as the gut microbiome.

A healthy microbiome is crucial for your dog's overall health, from nutrient absorption to mental health.

When bacteria become out of balance, disorders such as inflammatory bowel disease (IBD), digestive issues, immune system reactions, diabetes, and even depression can result. Modern society is seeing a rise in microbiome-associated disorders in our dogs and ourselves. This is due to modern pet food diets, medications, and lifestyle choices. Luckily, it is possible to restore and maintain a healthy gut microbiome for your lovely pet without using medications (with adverse side effects).

Sometimes your dog might have a wide range of different types of gut microbes, but they are out of balance. It will be very helpful to help gastrointestinal system to restart freshly and in the right way.

Laxafit is designed as digestive moderator and laxative for use in dogs over the age of 12 weeks.

Active Ingredients:

Psyllium, Blend of Beet Pulp, Flaxseed, Pumpkin Powder, Dandelion Root....up to 1,000 mg
