

AGROZYME

Feed Quality Improver

Agrozyme multi grain enzyme blend is designed to enhance the digestibility of grains for poultry, leading to improved nutrient absorption and overall bird health.

Agrozyme ensures maximum digestion of complex carbohydrates and proteins, resulting in better feed efficiency and performance.

Agrozyme increases the availability of phosphorus and other essential nutrients in the feed, leading to improved bone health and growth.

Agrozyme improves nutrient absorption and reduced feed costs, as poultry are able to utilize the energy and nutrients present in the feed more efficiently.

Purpose of Usage:

- Maximize feed efficiency
- Ultimately increases profitability
- Increasing the productive performance
- Improving the FCR
- Minimizing environmental pollution due to reduced nutrient of manure

Main Ingredients:

Beta Glucanase, Xylanase, Phytase, Protease and Cellulase

Dosage and Administration:

Powder: It is used by mixing 500 g to 1 kg per tone of animals feed.

Liquid: It is used by mixing 250 to 500 ml per 1000 lit of drinking water.

Packaging:

Agrozyme is conveniently packaged in 10 kg bucket, 25 kg bags, 5 lit and 10 lit cans, ensuring convenient handling and storage.

Storage Condition:

The product must be stored protected from light and heat, dark between 5°C and 25°C.

Target Animals:

Broiler, Layer, Turkey, Ostrich
