

AMINO-PASS

Mixture of By-PASS Amino Acids

Aminopass, is a by-pass combination of amino acids that is specifically designed to support the health and productivity of ruminant animals.

Aminopass ensures that the animals receive the necessary nutrients to support their metabolic processes and overall health.

Purpose of Usage:

- Overall health and performance of the animals
- Improves milk production
- Enhances the quality of the milk

Main Ingredients:

Methionine, Lysine, Threonine and Choline Chloride

Dosage and Administration:

It is used by using 10 to 15 g per cow per day on top of the feed.

Packaging:

Aminopass is conveniently packaged in 10 kg bucket and 25 kg bag, ensuring convenient handling and storage.

Storage Condition:

The product must be stored protected from light and heat, dark between 5°C and 25°C.

Target Animals:

Cattle, Dairy
