

RESPIFIT

Respiratory Support

The presence of slime in the respiratory tract results in a reduction of oxygen intake, and breathlessness and can cause even death. Birds also face a lack of energy for weight gain or egg production. Furthermore, slime serves as a breeding ground for bacteria and viruses. In many respiratory diseases, such as bronchitis, the cause of the disease does not cause death, but choking results in increased damage.

respiratory disease is the single most important cause of livestock morbidity and mortality

Purpose of Usage:

- anti-inflammatory, antimicrobial and immune-boosting properties
- Dilation of bronchia
- Excellent support during respiratory problems
- Improves feed and water intake
- Disinfection Activity
- Anti mucus production

Main Ingredients:

Ethanol, Eucalyptus Oil, Menthol, Peppermint Oil and Lactic Acid

Dosage and Administration:

It is used by mixing 100 to 200 ml per 1000 lit of drinking water.

Packaging:

Respifit is conveniently packaged in 250 ml bottle, 1 lit and 5 lit cans, ensuring convenient handling and storage.

Storage Condition:

The product must be stored protected from light and heat, dark between 5°C and 25°C.

Target Animals:

Broiler, Layer, Turkey, Ostrich, Cattle, Dairy, Sheep, Horse
