

# TOXIFIT

## Toxin Binder and Remover

Toxofit is carefully formulated to effectively bind toxins and mycotoxins, protecting the health and well-being of animals.

By utilizing the natural binding properties of this formula, Toxofit helps prevent the harmful effects of toxins on digestive systems, ultimately improving their overall performance and productivity.

#### Purpose of Usage:

- Helps maximum binding capacities especially for Aflatoxins to prevent any performance degradation in poultry and ruminant
- Increases the feed utilization of animals at the maximum rate
- Helps to maintain the nutritional value
- Controls the excess moisture in feed

#### Main Ingredients:

Clinoptiolite and Bentonite

#### Dosage and Administration:

It is used by adding 500 g to 1 kg per ton of animal feed.

#### Packaging:

Toxofit is conveniently packaged in 10 kg bucket and 25 kg bag, ensuring convenient handling and storage.

#### Storage Condition:

The product must be stored protected from light and heat, dark between 5°C and 25°C.

#### Target Animals:

Broiler, Layer, Turkey, Ostrich, Cattle, Dairy, Sheep, Horse
