

TOXIFIT SUPER

Toxin Binder and Remover

Toxofit Super is carefully formulated to effectively bind toxins and mycotoxins, protecting the health and well-being of animals.

By utilizing the natural binding properties of this formula, Toxofit Super helps prevent the harmful effects of toxins on digestive systems, ultimately improving their overall performance and productivity.

Purpose of Usage:

- Reducing the adsorption of harmful substances from the alimentary canal
- Prevents various mycotoxins (Zearalenone, Vomitoxin, Ochratoxin, T2 Toxin and Fumonisin) with its maximum toxin binding capacity, from penetrating into the gut to prevent any performance degradation
- Protects the liver with the liver protectors in its content
- Increases the feed utilization of animals at the maximum rate
- Helps to maintain the nutritional value
- Controls the excess moisture in feed

Main Ingredients:

Clinoptiolite, Bentonite, Yeast Cell Wall and Liver Protector

Dosage and Administration:

It is used by adding 500 g to 1 kg per ton of animal feed.

Packaging:

Toxofit Super is conveniently packaged in 10 kg bucket and 25 kg bag, ensuring convenient handling and storage.

Storage Condition:

The product must be stored protected from light and heat, dark between 5°C and 25°C.

Target Animals:

Broiler, Layer, Turkey, Ostrich, Cattle, Dairy, Sheep, Horse
