

Urinary system support tablets for cats and dogs

What is helpful?

If your dog suffers from kidney or bladder problems, ease their discomfort with any of the choices on our list of the best urinary, kidney, and bladder supplements for dogs. Seeing your furry friend in distress can be upsetting, but with a bit of research and some guidance from your veterinarian, you can aid your darling dog and lessen their suffering by introducing supplements to their diet.

Although these urinary health supplements won't cure disease, they can nourish your dog while helping their symptoms.

What is the best supplement for bladder stones in dogs?

Supplements that promote urinary tract health include fish oil, vitamins A & D, vitamin B complex, and vitamin C which helps acidify urine and prevent infections.

Urinate frequently: Going to the bathroom frequently can help clear the bacteria from pet's bladder and urethra.

Use heat: Gentle heat can reduce abdominal pain and discomfort.

What food irritates the bladder?

- Caffeine.
- Certain acidic fruits — oranges, grapefruits, lemons and limes — and fruit juices.
- Spicy foods.
- Tomato-based products.
- Chocolate.

Which dog food is best for a dog's urinary health?

Certain dog breeds are more prone to developing bladder stones, as well as senior dogs and females. There are specially formulated dog foods on the market to help combat these problems. These products have less risky ingredients and more supporting agents.

Can dog food cause urinary problems?

High levels of certain minerals in dog food can increase the chance of crystal formation in urine. Magnesium and phosphate are mineral components of the most common crystal type struvite. Don't feed a dog food with excessive amounts of these minerals. The dog food your dog eats also influences urine acidity.

the best kidney supplements for dogs.

One of the best kidney supplements for dogs, it is the supplement which supports kidney health, normal liver function, homocysteine balance, stress management, immunological and antioxidant defense system activities, and renal circulation. Basically, it's a multivitamin for normal kidney function.
