

URO-PASS

Coated By-Pass Urea

Uropass, is a by-pass urea supplement designed specifically for ruminants.

Urea is a vital component in the diet of ruminant animals, as it provides a source of non-protein nitrogen that is essential for rumen function. By incorporating Uropass into the feed of cows on a daily basis, it ensures that animals are receiving the necessary nutrients to support healthy digestion and metabolism.

Purpose of Usage:

- Improves feed efficiency
- Boosts milk production
- Supports overall animal health

Main Ingredients:

Urea

Dosage and Administration:

It is used by using 10 to 15 g per cow per day on top of the feed.

Packaging:

Uropass is conveniently packaged in 10 kg bucket and 25 kg bag, ensuring convenient handling and storage.

Storage Condition:

The product must be stored protected from light and heat, dark between 5°C and 25°C.

Target Animals:

Cattle, Dairy
