

# VITA-PASS

## Coated By-Pass Multivitamins

Vitapass is coated by lipid, designed to bypass the rumen and release its main ingredients in the intestine after the lipid is digested by pepsin. This unique delivery system ensures that the essential vitamins and minerals in Vitapass are effectively absorbed by the animals, providing maximum benefits.

By incorporating Vitapass into diet, animals receive the necessary levels of vitamins and minerals, helping to mitigate the risk of nutritional deficiencies and promote optimal growth and development.

#### Purpose of Usage:

- Overall health and well-being of animals
- Improves growth and reproductive processes

#### Main Ingredients:

Vitamin A, Vitamin D3, Vitamin E and Selenium

#### Dosage and Administration:

It is used by using 10 to 15 g per cow per day on top of the feed.

#### Packaging:

Vitapass is conveniently packaged in 10 kg bucket and 25 kg bag, ensuring convenient handling and storage.

#### Storage Condition:

The product must be stored protected from light and heat, dark between 5°C and 25°C.

#### Target Animals:

Cattle, Dairy
